The New York State Department of Transportation (NYSDOT) is seeking Design-Build services to complete Phase 1 of the Kosciuszko Bridge Project. The Project involves the construction of a new 1.1-mile long eastbound (or Queens-bound) bridge structure, which will be built parallel to and on the eastbound side of the existing bridge with sufficient width to carry all traffic until Phase 2 of the project is complete. The Project will also include the demolition of the existing Kosciuszko Bridge. Phase 1 will allow the Department to shift all traffic off the existing bridge and onto the new eastbound bridge structure. Phase 2, which will involve the construction of a new westbound (Brooklyn-bound) bridge structure built within the footprint of the existing Kosciuszko Bridge, will be issued as a separate future contract.

The Draft RFQ was published on December 21, 2012 to the following NYSDOT web site:
