4.5.C. PUBLIC HEALTH LAW, STATE SANITARY CODE,
SECTION 225, SUBPART 5-1, PUBLIC WATER SYSTEMS

These regulations are promulgated by the New York State Department of Health and contain the Maximum Contaminant Levels (MCLs) that are referenced in the EPM, Chapter 4, Section 4.4 - "Aquifers", Part I. a). Section 1424(e) of the Safe Drinking Water Act requires that certain federally-funded projects, in Sole Source Aquifer Project Review Areas, not exceed "any national contaminant level set forth in any promulgated National Primary Drinking Water Standard at any point where the water may be used for drinking". In New York State, the MCLs given in Subpart 5-1 (this attachment) are the standards that apply for this requirement. Therefore, if a "Pollutant Loadings Analysis", "Toler Analysis", or any other water quality assessment methodology is conducted pursuant to Section 1424(e) of the Safe Drinking Water Act, use the MCLs in this Part, as appropriate.
