CONDITIONS FOR USE OF ENTAC (REGISTERED TRADEMARK
OF ENTAC NORTHEAST, INC.)
WITH DETERMINATION OF ENVIRONMENTAL COMPATIBILITY BY
NEW YORK STATE DEPARTMENT OF ENVIRONMENTAL CONSERVATION
IN CONSULTATION WITH THE NEW YORK STATE DEPARTMENT OF HEALTH
FOR THE NEW YORK STATE DEPARTMENT OF TRANSPORTATION
APPROVED MATERIALS LIST (UNTREATED USE)

1. Entac Northeast, Inc. shall ensure that every applicator of Entac in New York State possesses and
complies with these conditions for Use.

2. These conditions do not override the need for any other permits (including DEC permits) or
approvals that may be required (e.g., use associated with activities in or near regulated wetlands,
surface waters, or other regulated natural resources).

3. No application shall be conducted when the National Weather Service forecasts greater than 25%
probability of precipitation in the application area to occur within 8 hours after the planned
application.

4. Applications shall not be made when the ground is saturated (due to precipitation or wetting) as
defined by visible pools of water at or in the vicinity of the application, in order to prevent the
movement of uncured Entac into the environment via precipitation.

5. The application rate, methodology, and handling precaution shall be in accordance with the
Application Instructions appended to these conditions.

6. Entac shall not be stored outdoors uncovered.

7. Any spill which could enter the waters of the state shall be reported to the DEC Spill Hotline
within 2 hours (1-800-457-7362). Any required response (including any needed cleanup) shall
then be determined by the DEC regional office.

8. Applicators will minimize any potential odor impacts from Entac on nearby receptors.
