Project Title: C-02-17: Consortia Administration Fees

PIN: R020-52-881, R02

Responsible Unit: Policy and Planning Division, Office of Policy, Planning and Performance

Project Manager: Hoole, Paul

Project Goal:

NYSDOT has access to three (3) research consortia. During the development of an RFP, the pros and cons of using each of the consortia are discussed with the Project Manager and a decision is made as to which consortia will be offered the opportunity to submit proposals. Setting aside funds for consortia administrative fees in effect reserves the fees so the choice of consortia can be made as the RFP is developed. It would be premature to decide on a consortia with involving the Project Manager and Technical Working Group in this decision. Once an RFP is issued and a contract is pending, the full cost for the research (PI cost + Admin Fees) will be designated for that project to keep the accounting clean.

Actions Proposed:

Hold potential fees in this account until it is know which consortia will be used, then transfer the appropriate amount to the specific project.

Anticipated Work Products and Accomplishments:

NA

Proposed Budget: $782,000
