Project Title: C-07-05: Transportation Land-Use Decision-Making
PIN: New Project
Responsible Unit: Region 10 - Planning
Project Manager: Glass, David

Project Goal:
To facilitate a coordinated land use and transportation planning process through education.

Actions Proposed:
• (10%) Research what other state departments of transportation are doing to achieve these goals
• (15%) Conduct interviews with municipalities in New York State to identify the degree of need for land use education and to identify good practices that could be emulated
• (60%) Develop educational products and an outreach program
• (15%) Develop an implementation and performance monitoring plan

Anticipated Work Products and Accomplishments:
• A report on best practices in New York State and across the country that effectively link transportation and land-use decision making and what project goals they achieve
• Customized Training Modules
  NYSDOT & MPO personnel
  Planning & zoning boards
  Village, town, city boards/councils
  Developers
  Consultants
  Civic Associations
  Media Outlets
• A transportation and land use manual
• Scope of an outreach program to inform municipalities about the program that may include the design of an informational website to be added to the NYSDOT website
• An implementation plan that identifies:
  Program ownership and accountability
  Action steps
  A performance improvement mechanism
• Start-up and recurring costs

Proposed Budget: $750,000
