Project Title: C-07-07: NYS Particulate Matter Silt Loading Factors
PIN: New Project
Responsible Unit: Environmental Analysis Bureau
Project Manager: Zamurs PhD, John

Project Goal:
The project goal is to conduct field monitoring in various geographical locations of NYS in order to determine actual particulate matter silt loading factors.

Actions Proposed:
• Identify the number and location of geographical areas to be monitored
• Develop an acceptable strategy for conducting the field monitoring
• Conduct the actual field monitoring
• Prepare a report describing the results of the field monitoring for the various locations

Anticipated Work Products and Accomplishments:
The project is anticipated to result in a document that includes particulate matter silt loading factors for the desired geographical areas of NYS.

Proposed Budget: $250,000
