Project Title: Z-01-02: Traffic Management Demonstration During NYS Fair
PIN: R020.98.881
Responsible Unit: Operating Division, Office of Operations Management
Project Manager: Roberts, Edward

Project Goal:
The goal of this project is to provide better information to travelers and system managers during the 2007 New York State Fair and to provide a recommendations supported by a model which will further improve traffic operations during the 2008 State Fair, by drawing upon all data available, including the field testing of E-ZPass readers purchased as part of earlier Electronic Toll and Traffic Management (ETTM) research.

Actions Proposed:
- Develop a data collection plan for 2007, including the use of portable E-ZPass readers
- Collect Data during 2007 New York State Fair
- Conduct Performance Analysis and Develop Simulation Models in TransModeler
- Develop Recommendations for 2008 New York State Fair
- Collect Data during 2008 New York State Fair
- Conduct Post Event Performance Assessment

Anticipated Work Products and Accomplishments:
- Report describing the analysis conducted
- Workshop

Proposed Budget: $200,000
