
Driver Endorsement: Pavement Striping Machine, truck-mounted

1. Holds a class B (or higher) CDL with Hazardous Material endorsement*

2. Holds NYSDOT Pavement Striping Machine, truck-mounted category 2 certification

3. Accurately maintains alignment of vehicle so that pavement markings are retraced
   a. Retraces existing pavement markings on roadways, gore areas and turning lanes in a manner that produces non-wavy, sharp-edged lines
   b. In the right hand driving mode, as equipped:
      i. Retraces exiting edge lines in a manner that produces non-wavy, sharp-edged lines
      ii. Maintains alignment so that lines are retraced
   c. Follows blacktop seams and compensates for bad seams
   d. Maintains uniform speed (8-10 mph) during pavement marking application

4. Identifies and/or responds to application problems as they occur and corrects as appropriate
   a. Shiny line (insufficient beads)
   b. Plugged tip
   c. Insufficient line width
   d. Weak color of line (low volume)

5. Recognizes pavement marking codes and errors in codes
   a. Locates and properly interprets pavement marking codes along the roadway
   b. Makes necessary adjustments to alignment of vehicle as necessary
   c. Recognizes errors in marking codes or questionable pavement markings in locations that may require further investigation

6. Maintains alertness to traffic and reacts to changing conditions
   a. Frequently checks traffic conditions around vehicle
   b. Maintains communication with other operators and vehicles regarding traffic conditions

7. Communicates effectively with other operators and other vehicles

* If the region uses only water-based paint, a hazardous materials endorsement may not be required. If the candidate does not hold a hazardous materials endorsement and one is not required, note this as a variation on the certification form.
