These listings include some planned touring routes under design and construction. Every effort is made to assure the accuracy of the various route descriptions in this book. The Department, however, assumes no responsibility for the possibility that these listings may not agree with routes as actually posted. A time lag normally exists between the determination of necessary route changes, actual posting of these routes, and changes in maps made by this Department and the various mapping companies.
This page intentionally left blank.
INTRODUCTION

Highway Touring and Reference Routes
The Interstate (I) and Federal (US) touring route systems are numbered by the American Association of State Highway and Transportation Officials (AASHTO) upon recommendations of the state. State (NY) touring route and Reference route number systems are numbered by the New York State Department of Transportation. Touring routes are signed with route markers. Reference routes are not generally signed with route markers.

Bicycle Touring Routes
New York State numbered bicycle routes generally correspond to the touring route number that they follow. State signed bicycle routes share the highway right of way with all other highway users.

Scenic Byway System
The National and State Scenic Byway Programs designate, maintain, and protect roads that have been nominated for their archaeological, cultural, historic, natural, recreational, and/or scenic qualities. Additional information can be found at:

National Scenic Byways Program: www.byways.org
New York State Scenic Byways Program: www.dot.ny.gov/display/programs/scenic-byways

Bridge and Highway Commemorative / Memorial Names
Commemorative and memorial name designations that are not designated as an official name are included in this listing. Name signs are placed at the end points of the designated portion of the highway.
### INTERSTATE (I) TOURING ROUTE NUMBER SYSTEM
