I-81 Viaduct Project
Onondaga County, New York

Appendix B: NYS DOT Demolition Plans ca. 1955-1966

Notes:
2. NYS DOT Demolition Plans were prepared at varying scales and at varying levels of detail, therefore the scale of this map set is correspondingly variable.
3. This map set only covers a portion of the APE for Direct Effects, presented as an example of the extent of demolition associated with the construction of I-81. All demolished structures identified within the full APE were digitized and are presented in Appendix A, Map 10.
4. This historic map has been geo-referenced with modern map features. Potential sources of error inherent in this process include cartographic inaccuracies, differences in scale, and changes in the modern landscape. The geo-referenced map therefore presents approximate locations of historic map documented features, and is not intended to depict survey-accurate information. 5. This is a color graphic. Reproduction in grayscale may misrepresent the data.
