</table>

The work envisioned for this project will include the replacement and retrofit of the superstructure and substructure on nine bridges over the Van Wyck Expressway, in order to prepare for the future widening of the Van Wyck Expressway mainline between Hoover Avenue and the southern end of Federal Circle. The project also includes intersection improvements to ensure ADA compliance.

A Best Value selection process will be used that will have two steps. A Request for Qualifications (RFQ) is anticipated to be issued in late March 2019. Responses to the RFQ will be evaluated to establish a listing of Design-Build firms that will be invited to submit Proposals in response to a Final Request for Proposals (RFP), scheduled to be issued in late June 2019. The “Best-Value” selection process will evaluate the ability of the Design-Builder to manage the Design-Build process, design, construct and control the Project to provide a quality product, on or ahead of schedule, for a reasonable lump sum price within the Department’s project budget.

The RFQ will establish the pre-qualification process for the firms seeking to be short-listed as proposers and will provide full details of the Statement of Qualifications (SOQ) required from interested firms.

The Department reserves the sole right, without incurring any liability, to change any aspect of the
proposed procurement described above, including the right to not proceed with the procurement and/or right to proceed in a different manner or on a different timeline than as described above.

All bid documents and amendments related to this project procurement will be posted on https://www.dot.ny.gov/main/business-center/designbuildproject48

Potential bidders are advised that under New York State Finance Law, communication on procurements can be made only with designated contact persons. The contact person for this procurement is:
