ANCHOR STUD SHALL BE 1" DIA. MINIMUM. FOR ANCHOR STUD DETAILS, SEE BD-BG6E.

**Note**: Additional information and specifications are provided in the document, including details on the installation, alignment, and calculations for the expansion bearing system. The table and diagrams illustrate the dimensions and requirements for the masonry and sole plates, including stud diameters, bearing heights, and other pertinent measurements. The text is technical and detailed, focusing on the engineering aspects of the bearing system.
