PIPE SLOPE DRAIN - TEMPORARY

APPLICATION NOTES:
1. The purpose of a pipe slope drain is to prevent erosion of embankment by using a pipe from a higher elevation to a lower elevation.

GENERAL NOTES:
1. APPROVED FILTER GEOTEXTILES are listed on the Department's Approved List.

MEASURES:
1. PIPE SLOPE DRAIN is to be inspected every seven (7) calendar days or after each rainfall of 12mm or more within a 24-hour period. Measures shall be cleaned and repaired as required.

2. PIPE SLOPE DRAIN may be corrugated plastic pipe or corrugated metal pipe and shall be installed at the Contractor's option. The pipe shall have watertight connecting bands or flange connections.

3. PIPE SLOPE DRAIN shall meet the requirements of light stone fillings on Figure 610-1.

GENERAL NOTES:
1. GENERAL NOTES:

2. PIPE SLOPE DRAIN shall be inspected every seven (7) calendar days or after each rainfall of 12mm or more within a 24-hour period. Measures shall be cleaned and repaired as required.

3. PIPE SLOPE DRAIN MAY BE CORRUGATED PLASTIC PIPE OR CORRUGATED METAL PIPE AND SHALL BE INSTALLED AT THE CONTRACTOR'S OPTION. THE PIPE SHALL HAVE WATERTIGHT CONNECTING BANDS OR FLANGE CONNECTIONS.

MEASURES:
1. PIPE SLOPE DRAIN shall meet the requirements of light stone fillings on Figure 610-1.

2. PIPE SLOPE DRAIN shall be designed to prevent erosion of embankment by using a pipe from a higher elevation to a lower elevation.

GENERAL NOTES:
1. APPROVED FILTER GEOTEXTILES are listed on the Department's Approved List.
