In our continuing effort to improve service to our customers, the following changes have been put into effect:

**Application for a New Divisible Load Overweight Permit (Perm 61) – 7/2008**

**Purpose:** Use to apply for a new Divisible Load Overweight Permit or for transfers or power unit replacements which result in the issuance of a new permit.

**Replaces:** Transfer Form (Perm 61) – 9/2007 which has been merged into the Application for a New Divisible Load Overweight Permit (Perm 61) 7/2008 mentioned above. The Transfer Form is now obsolete.

The introduction of the Application for a New Divisible Load Overweight Permit (Perm 61) – 7/2008 also affects the Application Divisible Load Overweight Permit (Perm 92) – 8/2007 which is intended for use when a lottery is in effect. Inasmuch as there is no lottery at this time, this form will no longer be available for use. Should a lottery situation develop, we will re-introduce the form at that time.

The Application for a New Divisible Load Overweight Permit (Perm 61) – 7/2008 incorporates a new format and many changes suggested by customers and our staff. There are resource buttons online which allows customers to readily access help on various items by using their mouse and clicking on the button. The form may be completed on the computer and is saveable provided the customer has Adobe 6.0 or higher.

**Application for an Amendment to a Divisible Load Overweight Permit (Perm 64) – 7/2008**

**Purpose:** Use to make changes to an active Divisible Load Overweight Permit.

**Replaces:** Amendment to Divisible Load Overweight Permit (Perm 64) – 8/2007 which is now obsolete.

The Application for an Amendment to a Divisible Load Overweight Permit (Perm 64) – 7/2008 incorporates a new format and many changes suggested by customers and our staff. There are resource buttons online which allows customers to readily access help on various items by using their mouse and clicking on the button. The form may be completed on the computer and is saveable provided the customer has Adobe 6.0 or higher.

**Renewal Confirmation Form**

**Purpose:** Allows customers the option of renewing an existing Divisible Load Overweight Permit with no changes (except for a power unit plate change) via email.

**Conditions:** The customer must have sufficient money on their account or arrange to pre-fund their account prior to completing and submitting the Renewal Confirmation Form.
