

To all Transmission Service Companies and Applicants:

The Department will again be requiring written approval from the various bridge authorities, to be submitted with the permit application, when the overall dimensions/weights exceed the values in the attached document.

When the overall dimensions/weights exceed legal but are less than the values on the attached document, the permit issued will be Stamped indicating that the permittee "Notify Bridge Authority Prior to Move at \_\_\_\_\_", with the respective phone number provided.

Applications that do not include written approval from the respective bridge authority, to exceed the values in the attached document, will be rejected, and those rejections will be coded as a Code 7.

If you have any questions please give me or Steve Conklin a call.

Sincerely,

Mark O. White, P.E.
