- Agencies (32)
- Surveyors (33)
- Consultants (34)
- Contractors (39)

Approved: [Signature]
Richard W. Lee, P.E.
Deputy Chief Engineer, Design

ADMINISTRATIVE INFORMATION:
- This Engineering Bulletin (EB) is effective upon signature.

PURPOSE:

The purpose of this EB is to announce the availability of Appendix 15 of the Project Development Manual, Risk Management for Project Development.

TECHNICAL INFORMATION:

This guide for Capital project risk management is intended to provide guidance and direction for practicing risk management during the project development process. The final draft of this guide was first made available in 2009. Since then, it has been used successfully on a number of Department projects and by our partners at AASHTO, FHWA and the New York State Thruway Authority. Managing risk properly continues to be a growing emphasis for our transportation industry.

All program and project managers should be aware of the risk management principles and practices contained in this guide and incorporate them as appropriate. Procedures and tools to more fully integrate risk management into the project development process will be made available in coming months.

TRANSMITTED MATERIALS:

This manual has been incorporated into the on line version of the Project Development Manual at: https://www.dot.ny.gov/divisions/engineering/design/dqab/pdm

CONTACT:
