

## **ITEM 10202.9901 M - PAVEMENT EXCAVATION**

**DESCRIPTION:** The Contractor shall remove and dispose of existing pavement where indicated on the plans or where directed by the Engineer.

**MATERIALS:** Not specified.

**CONSTRUCTION DETAILS:** The Contractor shall remove the pavement in a neat workmanlike manner by any suitable means that does not damage the adjacent pavement or existing underground utilities. Sawing to neat lines will be required before the removal of concrete pavement. This work must conform to the details shown on the plans. The removed concrete shall be properly disposed of by the contractor, off the right-of-way as approved by the Engineer.

**METHOD OF MEASUREMENT:** Pavement Excavation will be measured by the number of square meters of pavement removed and disposed of.

**BASIS OF PAVEMENT:** The unit price bid per square meter for this item shall include the cost of furnishing all labor, materials, and equipment necessary to remove and dispose of the pavement, mesh reinforcement, transverse joints, and longitudinal ties.

Payment shall be the same regardless of whether the entire thickness of pavement is removed or simply the top surface of pavement is removed to provide a transition for resurfacing.

Saw cutting will be paid for under the appropriate items; except that no payment will be made for sawcuts which are not called for in the plans and which are made for the Contractor's convenience.
