

ITEM 17203.0350 M - ROCK EMBANKMENT-IN-PLACE

All of the requirements of Item 203.03 M, Embankment-In-Place shall apply except as herein modified:

MATERIALS.

A. Gradation

Materials furnished for use under this Item shall consist of blasted or broken rock having no particles greater than one (1) meter maximum dimension and shall be substantially free of particles smaller than 25 mm in maximum dimension. When placed above water, the maximum particle size shall not exceed $\frac{2}{3}$ of the thickness of the lift under construction.

B. Soundness

The material shall be sound and durable as determined by a visual inspection by a Department Geotechnical Engineer. When the State elects to test for the soundness requirement, a material with Magnesium Sulfate Loss exceeding 35 percent will be rejected.
