

## **Item 11203.2802 M - Hydraulic Fill**

### Description:

The work shall consist of placing fill by hydraulic methods in pipes and structures to be abandoned under this contract as indicated on the plans or directed by the Engineer.

### Materials:

Hydraulically placed fill shall be composed of sand, free of any organic substances, suitable for placing by hydraulic methods.

### Construction Details:

Fill shall be placed by a method approved by the Engineer in order to fill pipes or structures as required to within 76mm of the inside top of pipes and to the required elevation within structures.

### Method of Measurement:

The quantity to be paid for under this item shall be measured as cubic meters of pipe or structure actually filled.

### Basis of Payment:

The unit price bid for this item shall include the cost of furnishing all materials, equipment, and labor necessary to complete the work, not to include bulkheading of pipes or removal of portions of structures to be paid for under their respective items where called for on the plans.
