

## **ITEM 03203.52 M - SWEEPING OF SHOULDERS**

### **DESCRIPTION:**

Under this work, the contractor shall sweep the paved shoulder areas free of dirt and debris by means of a mechanical sweeper, as shown on the plans, details, or as ordered by the Engineer. This includes any pick up and proper disposal of items on the shoulder whose removal is necessary to perform the sweeping operation.

### **MATERIALS:**

None specified.

### **CONSTRUCTION DETAILS:**

Sweeping of shoulders shall consist of using a mechanical sweeper to clear the highway shoulder of dirt and debris, and to deposit it in a proper location approved by the Engineer.

### **METHOD OF MEASUREMENT:**

The work will be measured as the number of linear meters of shoulder measured along each edge of roadway along which the above described work is performed. The Engineer will determine the areas where this work is not required.

### **BASIS OF PAYMENT:**

The unit price bid per linear meter for this work shall include the cost of furnishing all labor and equipment necessary to satisfactorily complete the described work and shall include removal and satisfactory disposal of excess material plus any repair of material damaged by the Contractor's operations.
