

ITEM 02203.5201 M - RESHAPING SLOPES ADJACENT TO PAVEMENT AND SHOULDERS

DESCRIPTION:

The Contractor shall grade and reshape the area adjacent to final pavement and shoulders to the lines and grades shown on the plans or as ordered by the Engineer. The work shall include grading and reshaping the existing slopes including removal of excess material to allow for proper surface drainage away from the paved area.

MATERIALS:

None specified.

CONSTRUCTION DETAILS:

The grading and reshaping shall include removal of sand, soil, sod, brush, and debris.

Material removed shall be disposed of in conformance with the provisions of Subsection 203-3.08, Disposal of Surplus Excavated Material.

The Contractor shall exercise due care to protect all trees, fences, markers, culverts, underground structures, utilities, and appurtenances within and adjacent to the work area. The Contractor shall replace in kind any facilities damaged by his operations at his own expense.

METHOD OF MEASUREMENT:

This work will be measured by the number of linear meters measured along the edge of the pavement or shoulder immediately adjacent to which the work is performed.

BASIS OF PAYMENT:

The unit price bid per linear meters for this work shall include the cost of furnishing all labor, equipment, and materials necessary to satisfactorily complete the work.

DISAPPROVED BY E109-024
