

**ITEM 08403.1550 M - ASPHALT CONCRETE-SHIM COURSE FOR WHEEL RUTS**

All of the requirements of Item 403.15 M, Asphalt Concrete - Type 5 Shim Course will apply with the following additions to Construction Details:

This item shall be used to fill wheel ruts in excess of 15 mm in depth prior to resurfacing. The material shall be placed by using a drag box with a maximum width of 1.2 m. The intent of the operation is to fill the low area only; it is not intended that the material be placed by a paver.

A single drum roller driven by smooth pneumatic rubber tires shall be used to compact the material.
