

ITEM 16555.99 M - REINFORCED CONCRETE BRIDGE ABUTMENT

DESCRIPTION

The work shall consist of constructing a reinforced concrete bridge abutment as shown on the contract plans.

MATERIALS

The materials used for reinforced structural concrete shall comply with the material requirement of Section 555-2 of the Standard Specifications.

CONSTRUCTION DETAILS

Construction details shall meet the requirements of Sections 555-3 and 556-3 of the Standard Specifications.

In addition, the Contractor shall submit a bar list and schematic showing the bar locations to the Engineer at least one week prior to the placement of the reinforcement.

METHOD OF MEASUREMENT

Payment will be made at the lump sum price bid for this work. Quantity estimates shown on the plans are for information only.

BASIS OF PAYMENT

The lump sum price bid shall include the cost of furnishing all labor, materials and equipment necessary to finish the work. Progress payments will be made according to the amount of work completed as determined by the Engineer.
