(SSPC-SP6) - LUMP SUM**

**ITEM 11571.03nn M -TREATMENT AND DISPOSAL OF PAINT REMOVAL WASTE  
(TOTAL REMOVAL ) - LUMP SUM**

**DESCRIPTION**

The work shall consist of accumulating, packaging, labeling, loading, transporting, treating, and disposing paint removal waste declared to be a hazardous waste containing lead. All requirements of Section 571-1 of the Standard Specifications shall apply.

**MATERIALS**

All requirements of Section 571-2 of the Standard Specifications shall apply.

**CONSTRUCTION DETAILS**

All requirements of Section 571-3 of the Standard Specifications shall apply.

**METHOD OF MEASUREMENT**

Payment shall be made by the lump sum price bid for each structure for treatment and removal of paint removal waste.

**BASIS OF PAYMENT**

The lump sum price bid for each structure shall include the cost of all labor, materials, equipment, sampling, testing, and fees necessary to complete the work based on the assumption that treatment by stabilization will satisfy the applicable Federal regulations. Should this prove not to be the case on an industry wide basis, as opposed to an individual Treatment or Disposal Facility, the difference in cost between the cost of treatment by stabilization and the method subsequently found to be necessary shall provide the basis for an order on contract. Only waste for which manifest copies are returned to the Engineer by the Contractor and Disposal Facility will be authorized for payment.

If the Department is fined or penalized as a result of the Contractor's performance or lack thereof on this item, in addition to other remedies the Department may possess, said fine or penalty will be deducted from monies due the Contractor.

The extent of the Contractor's compliance with the provisions under timeliness of disposal will be considered as relevant in any future determination of an award to the Contractor as the lowest responsible bidder for any project under the supervision of the Department.

**NOTE:** nn denotes serialized pay item (See §101-53), and represents numbers assigned by the designer and keyed to a particular structure. See elsewhere in these contract documents for a list of structures and the numbers assigned to nn. Normally, the same number will be assigned to a particular structure for containment, painting, and treatment & disposal of paint removal waste.
