

**ITEM 11606.9987 M - HEAVY POST BLOCKED-OUT CORRUGATED BEAM
GUIDERAILING CONNECTION TO WALLS
(APPROACH ENDS)**

Description: The Contractor shall furnish and install a galvanized heavy post blocked-out corrugated beam guide railing connection to wall (approach ends) system at the locations indicated on the contract plans.

Materials: Materials furnished shall meet the requirements of subsection 710-20 of the standard specification, except that the posts, back-up plates, offset beams, soil plates, channels, expansion anchors, rails, base plates, and hardware shall be as detailed on the standard sheet “Heavy Post Blocked-Out Corrugated Beam Guide Railing and Median Barrier”, except where modified on the contract plans.

Construction Details: The guide rail system shall be erected in the position and manner indicated on the standard sheets and contract plans and in a manner approved by the Engineer. Any damage caused to the existing structure shall be repaired by the Contractor to the satisfaction of the Engineer.

Method of Measurement: Guide railing connections shall be measured by the number furnished and installed in accordance with the plans, specifications, standard sheets, and as directed by the Engineer.

Basis of Payment: The price bid for each guide railing connection shall include the cost of all labor, equipment, material and the repair of any damage caused by the Contractor’s operations.
