

ITEM 09607.25 M - INSERT SLATS FOR SCREEN FENCING

Description:

Under this item, the contractor shall furnish and install screening insert materials in chain link fence where shown on the plans or ordered by the Engineer.

Material:

Fence slat materials shall be specified in the contract documents.

Construction Details:

Each insert slat shall have sufficient length to extend from the bottom to the top of the fence fabric to be inserted into. Slats shall be installed in accordance with the manufacturers instructions. Slats that extend beyond the fence fabric shall be cut to length as directed by the Engineer. Slats shall be installed in a workmanlike manner as to provide a uniform, neat appearance to the satisfaction of the Engineer.

Method of Measurement:

This work will be measured as the number of square meters, to the nearest 1/10 square meter, of fence in which slats are placed. To compute this area, fence will be measured from top to bottom and along the top of the fence, center to center of end post, between which insert slats have been installed.

Basis of Payment:

The unit price bid per square meter shall include all materials, equipment and labor necessary to complete the work, including clean up, disposal and restoration of the site to the satisfaction of the Engineer.
