

ITEM 10607.3621 M - REPAIR AND RESET EXISTING FENCE GATE (DOUBLE LEAF)

DESCRIPTION

The Contractor shall repair and reset fence gates as ordered by the Engineer in the locations as specified in the plans.

MATERIAL

All replacement parts shall meet requirements of Subsection 607-2, Materials.

CONSTRUCTION DETAILS

Each leaf of the existing gate shall be reset to swing freely. All hinges shall be cleaned and be coated with a graphite lubricant. With the exception of barbed wire and supporting arms, any broken parts and components shall be replaced. Gate stops shall be replaced in all locations. If removal of gate is required for repair, safety wire fence shall be installed across opening meeting requirements of Subsection 107-05E.

A new master key lock and three sets of keys shall be provided under this item.

METHOD OF MEASUREMENT

This work will be measured by the number of fence gates (double leaf) repaired and reset as specified on the plans or as ordered by the Engineer.

BASIS OF PAYMENT

The unit bid price for each fence gate repaired and reset includes the cost of furnishing all labor, materials, and equipment necessary to complete the work, including the cost of safety wire fence.

Barbed wire strands and supporting arms, if existing, shall be removed under a separate item.
