

## **ITEM 04609.0210 M - GRANITE CURB, 200 mm**

All the provisions of Section 609 of the Standard Specifications shall apply except the material dimension and finish shall be modified as follows:

**Dimensional Requirements:** Granite Curb shall have a top width of 200 mm and shall be 400 mm deep, plus or minus 25 mm. The bottom width shall be 200 mm minimum for the entire length.

### **Finish**

**Back Surfaces:** Back surfaces shall be sawed and finished to approximately true planes for a distance of 75 mm from the top of curb.

**Front Exposed Face:** Front surfaces shall be sawed and finished to approximately true planes for a distance of 200 mm down from the top of the curb. The sawed front face shall have no batter over the 200 mm exposure. When sawed, no projection or depression shall be greater than 5 mm. Saw marks normal to the sawing process will be permitted if within the 5 mm tolerance.
