

ITEM 05615.0416 M - TREE GUARDS

Description: The Contractor shall furnish and install tree guards at locations as shown on the plans or as ordered by the Engineer.

Materials:

- A. Materials shall be as specified in the contract documents.
- B. Connecting Hardware - All hardware shall be as supplied or recommended by the manufacturer, as specified in the contract documents or as approved by the Engineer.
- C. The sizes, shapes, finishes and colors of all tree guards shall be as specified in the contract documents.

Construction Details:

The tree guards shall be installed in the locations indicated in the contract documents, in accordance with the instructions supplied by the manufacturer, as indicated in the contract documents and as approved by the Engineer.

Tree guards shall be set plumb. Coordination with tree planting shall be required to assure that the tree is centered within the tree pit and equidistant from the tree grate before the tree guard is attached. Tree guards are to be compatible with the existing, reinstalled, or newly installed tree grates for which they are intended.

Method of Measurement: The work will be measured as the number of tree guards furnished and installed in a manner satisfactory to the Engineer.

Basis of Payment: The unit price bid shall include the cost of all labor, materials and equipment necessary to satisfactorily furnish and install the tree guards.
