

ITEM 661.50 11 – REMOVE ELECTRIC SERVICE BOX (BUREAU OF GAS AND ELECTRICITY)

DESCRIPTION

Under this item the Contractor shall remove the existing electrical service box from the location designated on the plans or where directed by the Engineer.

MATERIALS

Excavation and backfill shall conform to Section 206, “Trench, Culvert and Structure Excavation”, of the Standard Specifications.

CONSTRUCTION DETAILS

The requirements of the “General Specifications for Street Lighting Facilities” contained in the publication “City of New York SPECIFICATIONS - Compiled 1970 for Use with State of New York Department of Transportation Construction Contracts” Section 37.05, shall apply.

The removed electrical service box shall become the property of the Contractor and shall be removed by him from the contract site.

The hole resulting from removing the service box shall be filled with material approved by the Regional Materials Engineer and compacted as directed by the Engineer.

METHOD OF MEASUREMENT

This work will be measured as the number of service boxes removed in accordance with the plans, specifications and orders of the Engineer.

BASIS OF PAYMENT

The unit price bid for this item shall include the cost of all labor, materials and equipment necessary to satisfactorily complete the work, including excavation, disposal and fill.
